Academic Year 2020-21
Department of Information Technology
SYLLABUS OF THE PROGRAM

Certificate programs in database administration typically cover several modules that provide students with a comprehensive understanding of database management systems. Some common modules that you may encounter in such programs include:

1. **Introduction to Databases:** This module provides an overview of databases, their purpose, and their importance in modern organizations. Students learn about database models, design concepts, and terminology.
2. **Relational Databases:** In this module, students learn about relational database management systems (RDBMS) and their components. They learn about the structure of tables, relationships between tables, and how to manipulate data.
3. **SQL Programming:** This module covers the Structured Query Language (SQL), which is used to communicate with databases. Students learn how to write SQL statements to perform various tasks, including creating tables, retrieving data, and modifying data.
4. **Database Design:** This module covers the process of designing a database, including conceptual, logical, and physical design. Students learn about normalization, data integrity, and how to create effective database schema.
5. **Database Administration:** This module covers the tasks and responsibilities of a database administrator (DBA). Students learn about database security, backup and recovery, performance tuning, and troubleshooting.
6. **Data Warehousing and Business Intelligence:** This module covers data warehousing concepts, including data mining and analysis. Students learn how to use business intelligence tools to gain insights from data.
7. **NoSQL Databases:** This module covers non-relational databases, such as document-oriented, key-value, and graph databases. Students learn about the differences between relational and non-relational databases and when to use each.

ACADEMIC YEAR: 2020-21

Objective and Outcome:-

1. Proficiency in SQL: Students should be proficient in SQL programming, including creating, querying, and modifying databases.
2. Familiarity with Database Management Systems: Students should be familiar with popular database management systems such as Oracle, MySQL, Microsoft SQL Server, and PostgreSQL.
3. Skills in Database Administration: Students should possess the skills necessary to administer databases, including tasks such as backup and recovery, performance tuning, and troubleshooting.
4. Understanding of Data Warehousing and Business Intelligence: Students should understand the concepts of data warehousing, data mining, and business intelligence and have practical experience using related tools.

Overall, the outcome of a certificate program in database administration is to provide students with the knowledge, skills, and practical experience necessary to manage and administer databases effectively.

Academic Year 2020-21

Department of Information Technology

Syllabus:- Cloud computing certificate course

In this course, you will learn the fundamentals of **cloud-based service** technologies, as well as how to best secure them. This course is designed for anyone who is new to **cloud computing** that needs to understand the **basics of security** and how they are implemented inside a cloud computing platform.

There are several modules that could be included in a certificate program focused on Cloud Security. Some potential modules include:

1. **Introduction to Cloud Computing:** This module would cover the basics of cloud computing, including the different cloud service models (SaaS, PaaS, IaaS) and deployment models (public, private, hybrid). It would also introduce the concept of cloud security and the unique challenges associated with securing cloud environments.
2. **Cloud Security Fundamentals:** This module would cover the fundamental principles of cloud security, including risk management, access control, data protection, and compliance. It would also introduce different security frameworks and standards relevant to cloud environments.
3. **Cloud Security Architecture and Design:** This module would cover the architecture and design principles for secure cloud environments. It would include topics such as network security, data encryption, identity and access management, and secure application development.
4. **Cloud Infrastructure Security:** This module would focus on securing the underlying infrastructure of cloud environments. It would cover topics such as virtualization security, container security, and securing cloud storage and databases.
5. **Cloud Operations and Incident Response:** This module would cover the operational aspects of managing secure cloud environments, including monitoring and incident response. It would also cover topics such as disaster recovery, business continuity planning, and compliance auditing.

Department of Information Technology

Objective and Outcome of certificate course cloud Security:-

1. Understand the fundamental principles of cloud computing and the different service and deployment models.
2. Understand the unique security challenges associated with cloud environments and the importance of risk management, access control, data protection, and compliance.
3. Design and implement secure cloud architectures, including network security, data encryption, identity and access management, and secure application development.
4. Understand the security implications of virtualization, containerization, and cloud storage and databases, and implement appropriate security measures.

Overall, the outcome of a certificate program in Cloud Security should be that students are able to design, implement, and manage secure cloud environments and understand the risks and challenges associated with cloud security. They should be able to make informed decisions about cloud security measures and governance and be able to keep up-to-date with emerging trends and technologies in the field.

CERTIFICATION PROGRAM IN FINANCIAL MARKET

REPORT

The BMS department of our college had organized Certification Program in Financial Market for the second and third-year students. The program is primarily divided into 2 modules

1. Financial Markets and Investment Planning
2. Financial Planning

The program was of good help to the students in understanding the concept of Finance Market. This also helps the students in updating their knowledge which will surely help them to be competitive. A total of 120 students participated in the certification program.

Outcome: - The program significantly enhanced students' knowledge of financial markets, investment strategies, and risk management. Participants developed a comprehensive understanding of market dynamics, investment instruments, and regulatory frameworks. The outcomes achieved by the students validate the program's effectiveness in preparing them for the dynamic and challenging financial market landscape.
