Intellectual Property Right

Monday, 28th March 2022

Report

The information regarding the IPR is essential in today's world where innovation-led Start-Up count every second. CSC took the initiative to bridge the gap by organising a webinar on Intellectual Property Rights. The webinar was aimed to generate awareness about Intellectual property rights (IPR) among the Intellectual class of Professors, Researchers, and students to know the importance and process of filing IPR. The Hon'ble resources person of the national webinar was Mr. Kuldeep Jangir (Examiner of Patents & Designs, at the Patent Office, Mumbai, Government of India).

Mr. Jangir started with the topic, what is Intellectual Property? He discussed different aspects of Intellectual Properties like what is a Patent, Patent Rights, Trademarks, and Industrial Design, he also gave various real-life examples and talked about various brands, and gave knowledge about the salient features of IPR. He concluded the talk by explaining the rationale of protection and the nature of IPR. IPR are monopoly rights. He emphasized that IPRs have to be renewed from time to time for keeping them enforced except in the case of copyright and trade secrets. The webinar was further enlightened by the interesting questions answer session in the last which gave true colour to the webinar and gave chance to young innovators to speak

their doubts regarding innovation and its protection. Over 150 participants attended the Webinar through online mode.

The webinar was a huge success.

Outcome:

It provided valuable awareness and insights on the various aspects of IPR among faculty members and students. It provided other benefits such as licensing, better collaboration and funding opportunities. Students and faculty members gained insight and realised, that the knowledge of Intellectual property rights not only helps innovators to protect their invention but also provides better opportunity in obtaining finance and funds for the research work.

About Conference

Hybrid is the New Uncertainty is a constant in today's business environments, with volatile market dynamics, customer demands, technologies, disruptions, and more. Managing transformation through this uncertainty requires maintaining a line of sight into key initiatives at every stage of the strategy-to-delivery journey. Otherwise, it's difficult to determine how strategic programs are progressing or whether outcomes are being achieved.

At the same time, human resources are exploring new ways of working that allow them to deliver faster. It's imperative to support the varied ways these resources work with the right level of guidance and guardrails. Organizations now have mixed execution methods that challenge the traditional approaches to top-down planning and governance.

Moving faster in response to business fluctuations requires eliminating silos and disconnects across the organization, with updated processes, and technology. Managing transformation requires building agility into portfolio planning and funding to quickly reprioritize and shift focus, ensuring both teams and money are focused on in most impactful areas.

LITERATURE REVIEW

1. Internet banking, ATMs, mobile banking, and credit cards are all included in Komal (2012)'s analysis of the evolution of E-banking services.
2. There is an emphasis in this study on comparing public and private Indian and foreign banking has a lot of potential, as this study indicates, but these opportunities must be taken to the advantage of.
3. A more customer-centric approach to online banking necessitates an understanding of the difficulties and opportunities that have arisen in Mobile Banking, ATMs and Internet Banking as well as credit cards in order to plan a more efficient and successful policy for online banking services.
