

Procedures and policies for maintaining and utilizing physical, academic and support facilities - laboratory, library, sports complex, computers, classrooms etc.:

- The college has Annual Maintenance Contract (AMC) wherein all mechanical, electrical and civil works are covered.
- The college has well lit classrooms having natural light and ventilation. The classrooms are coloured periodically and the benches are spacious which provides ease to the learner in learning.
- Each department is provided with a projector to facilitate ICT requirements of that department thereby making the teaching effective.
- The college has two IT labs which help the learner in getting practical knowledge in IT related subject. The laboratory is maintained by IT technician who ensures that the equipment are maintained properly and aids in troubleshooting.
- The college has dedicated support staff which ensures that the classrooms and the college in general are clean. The college has sufficient number of washrooms which are cleaned at regular intervals during a day to ensure hygiene.
- The college provides portable water which is purified using effective purifiers, which are maintained and their upkeep is done on a regular basis. The water storage tank is also cleaned at frequent intervals.
- The college has an air conditioned library which helps the learner in enriching their knowledge. The library has a good collection of books, magazines, periodicals and journal.
- The Library staffs ensures proper handling of books, newspapers, periodicals and journal and also assist the students in accessing to online resources.
- The gymkhana is managed by Full time sports trainers. They maintain register for utilisation of sports equipment by students. The gymkhana keeps proper track of the equipment issued to the students and return of the same.
- Round the clock security services for safety and security available on campus
- The diagnostic equipment are calibrated once in a year for precise measurement.
- Calibration faults detected in between are repaired immediately.
- Voltage stabilizers and UPS.
